

# Oxygen Boost

## *For Brewers*

**sisbrew.com**

### DESCRIPTION

This peroxide based booster gives your CIP products an extra punch to loosen up and remove organic soils. It works great on heat exchangers and tanks or lines with hard to reach areas.

### DIRECTIONS

For best results, use in conjunction with a CIP product, such as Circulate, A-CIP or TLC. During normal caustic CIP cycle, halt circulation for the last 5-10 minutes. Add 1-2 ounces of Oxygen Boost (depending on soil load) to solution. Restart circulation of solution through equipment. Drain and rinse with clean water.

### APPLICATIONS

#### For cleaning

- > Circulation / Clean In Place systems
- > Brewery and beverage systems
- > Stainless steel cleaning / passivation

### SPECIFICATIONS

Color.....	<b>Colorless</b>
Fragrance .....	<b>None</b>
pH Range.....	<b>5.0 - 5.5</b>
Dilution .....	<b>1 - 2 oz. / solution</b>
Density.....	<b>9.59</b>

### PACKAGING

5 gallon .....	<b>BPSA51-05</b>
